

Important Safety Information

Be sure to read this installation pamphlet in its entirety before commencing installation.

Always ensure mains power is switched OFF before commencing any electrical work.

This product must be installed by a **licenced electrician** in accordance with AS/NZS 3000.

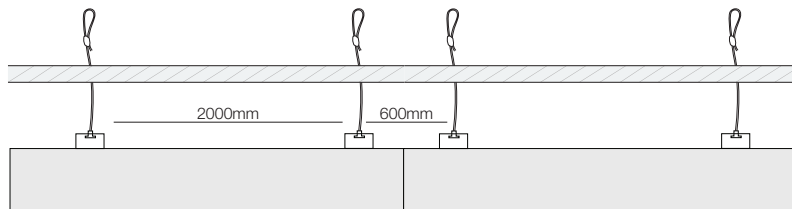

No part of the luminaire should be modified, if the luminaire is damaged it should be returned to Trend Lighting.

The light source of this luminaire is not replaceable; when the light source reaches its end of life the whole luminaire shall be replaced.

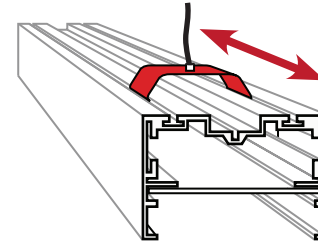

Positioning and Placement

Suspension cables should be placed every 2 meters and positioned within 300mm either side of joints.

See below example indicating placement of suspension cables and brackets as a guide.

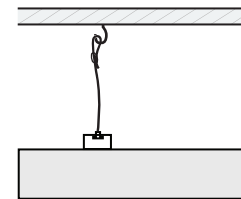

Step 1

Slide suspension bracket onto extrusion & position brackets into their approximate mounting position.

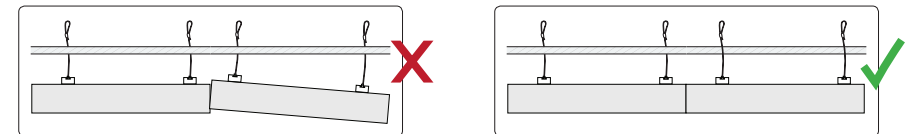

Step 2

Attach suspension cable to suitable anchor point on ceiling and tighten suspension cable locking terminal.

Step 3

Ensure extrusion is level and adjust suspension cable locking terminals if required.

Step 4

Ensure suspension cables are vertical without excessive angles. Move the sliding suspension bracket to re-adjust the angle of the suspension kit if required.
